

I oppose HR 4026. This is yet another attempt by the NAB to limit freedom of speech and force me to endure their commercial radio stations, all of which are owned by Clear Channel, to gain rudimentary information which should be free to all via any media available. What is next - no weather or traffic on the internet? When will these behemoths be stopped? They are poster children for "monopoly". I subscribe to XM Satellite radio because there are no other choices in my region.

How many beer and car commercials will the FCC force me to listen to just to get traffic & weather? Please reject the NAB petition 04-160! Please refer to the First Amendment for guidance, if needed...
